

Book I. Prop. II. Prob.

*From a given point (————), to draw
a straight line equal to a given straight
line (————).*

Draw (post. I), describe  (pr. I.1),

produce ———— (post. II),

describe  and  (post. III);

produce ———— (post. II),

then ———— is the line required.

For  =  (def. 15),

and  =  (const.),

$\therefore$  =  (post. III),

but (def. 15)  =  = ;

$\therefore$ ———— drawn from the given point (————), is equal to the given
line ————.
