

Book I. Prop. X. Prob.

To bisect a given finite straight line
(**— · · · ·**).

Construct  (pr. I.1),
draw , making  =  (pr. I.9).
Then  =  by (pr. I.4),
for  =  (const.)  = 
and  common to the two triangles.
Therefore the given line is bisected.

Q. E. D.
