

Book I. Prop. XVIII. Theor. *In any*

triangle  *if one side*  *be*
greater than another  *, the an-*
gle opposite to the greater side is greater
than the angle opposite to the less. I.e.

 $>$ .

Make  $=$  (pr. I.3), draw
.

Then will  $=$  (pr. I.5);

but  $>$  (pr. I.16)

$\therefore$  $>$  and much more

is  $>$ .
