

Book I. Prop. XXXIII. Theor.
*Straight lines (——— and ———)
 which join the adjacent extremities of
 two equal and parallel straight lines
 (——— and), are themselves
 equal and parallel.*

Draw ——— the diagonal.

——— = (hyp.)

▲ = ▲ (pr. I.29)

and ——— common to the two
 triangles;

∴ ——— = ———, and

▲ = ▲ (pr. I.4);

and ∴ ——— || ——— (pr. I.27).
