

Book I. Prop. XXXVIII. Theor.
*Triangles ( and ) on equal bases
and between the same parallels are
equal.*

Draw || } (pr. I.31)
and  ||  }

but = twice (pr. I.34),

and  = twice  (pr. I.34),

$$\therefore \text{orange triangle} = \text{blue triangle} \text{ (ax. VII).}$$
